

ALUMIER MD PEEL

PRE & POST CARE/CONTRAINDICATIONS

PRE-TREATMENT CARE

- You may not be treated if you:
 - have used isotretinoin in the last six months
 - have damaged/open skin including cold sores
 - have allergy to Asprin
 - are currently undergoing cancer treatment (chemotherapy/radiation)
 - keloid scar on your face or neck area (a test spot may be performed at the cost of the client, other treatments may be considered)
 - have an immune system disease (Hepatitis C, Aids, HIV, Collagen Vascular Disease, or other)
 - have had any of the following in the past 14 days: chemical/enzyme peel, laser hair removal, photofacial, RF skin tightening, microdermabrasion
 - have had any of the following in the past 7 days: waxing, threading, other hair removal, botox, dermal filler
 - have had the following in the past 3 weeks: sun exposure, tanning bed exposure
 - have active eczema, psoriasis, or dermatitis in the area
 - have an allergy to skincare products
 - are pregnant or breastfeeding
 - Discontinue use of retinoids 48 hours prior to your appointment
 - Wait 6 months following isotretinoin (Accutane)
 - If you have frequent cold sores, ensure you have taken cold sore medication prior to treatment, peels can cause a flare up
 - 7 days before – no brow waxing/microdermabrasion/laser procedures/chemical peels/sun/tanning beds/sunless tanner/aggressive at home exfoliating
 - For best results, do not smoke 7 days prior to peel appointment to improve circulation
-

THE DAY OF

- Arrive to your appointment with the treatment area free of make up
 - Remove contact lenses prior to treatment
 - Begin the day with a gentle skin care routine (no active ingredients or exfoliation)
 - Avoid any activities that will increase the body temperature/cause sweating for at least 2 hours before and after treatments
-

POST-TREATMENT CARE

- Redness/sensitivity is possible for the remainder of the day, and possibly the next day
 - Ensure anything touching the treated area is clean: pillow cases, phone screen, your hands, etc.
 - Use post care as follows: Cleanse with SensiCalm (gentle, cream cleanser), apply Rescue Balm (post treatment hydrating cream), apply Sheer Hydration (morning only). Reapply cream & SPF as necessary OR other regimen IF recommended by practitioner
 - After skin is fully healed (no more peeling, flaking or dryness, normally 7 days), return to normal skin care routine including exfoliants and actives
 - Mineral makeup is preferable between treatments
 - No makeup should be worn immediately after treatment, makeup can be applied the following day
-

NEXT TREATMENT

- Schedule treatments 4-6 weeks apart depending on your goals, this will be determined with your technician
- If you experience any side effects to this treatment that you are unsure of, or that have not been explained to you, contact Odette's Clinic immediately with pictures (if applicable)
